

PROJECT CHARTER

(Revised Version – October 19, 2007)

1. Introduction

Over the last years, sport has increasingly gained recognition as an effective means of achieving development goals. The International Platform on Sport & Development (the 'Platform') at www.sportanddev.org is a website entirely dedicated to the thematic field of Sport & Development.

For the purposes of the Platform, Sport is defined as

*“all forms of physical activity that contribute to physical fitness, mental well-being and social interaction, such as play, recreation, organized or competitive sport, and indigenous sports and games”.*¹

Development is broadly understood as *“processes that enlarge people’s choices”* – a definition often used by the United Nations.

The Platform is a collaborative initiative supported and governed by a diverse set of stakeholders who are committed to contributing to the field of Sport & Development. The stakeholders support the strategic framework (vision, mission, goals, and target groups) of the Platform.

The *Project Charter* provides the guiding principles, structure and procedures for the governance of the Platform as well as the responsibilities and composition of the bodies involved.
