ENGSO Youth actively works on current youth sport issues (health, sport accessibility, human rights, social inclusion, volunteering, the fight against doping, fair play, participation) with its member organisations, European institutions and partners from civil society. We are at the forefront of European youth sport advocacy work.

We are looking for competent, motivated individuals who are active in related areas, have an interest in the field of youth to represent our organisation at conferences and meetings as well as to be the core consultants on youth and sport, in consideration of their own areas of expertise.

If you are motivated to share experiences and expertise, contribute to current areas of discussion and participate in, learn and gain from the ENGSO Youth network, please apply online: www.youth-sport.net/delegates

Education through sports
We believe that physical activity is not just a public health issue; it benefits society by increasing social interaction and community engagement, comprises an investment in future generations and offers numerous possibilities for non-formal education and inclusion.

Co-determination, democratic participation and inclusion
We believe that young Europeans can be unique agents of social change and should be involved on all levels of the European social environment.

Equal access to health and well-being
We believe that young Europeans, regardless of their economic and social status, should have equal opportunities and access to healthy lifestyles: sufficient physical activity, healthy nutrition and education.
