April 2012: Jambo Bukoba e. V. at a glance

We focus on Tanzania and reach children and teenagers at their schools!

Approx. 2.5 mio people live in Kagera region in the north-west of Tanzania. ⅕ of them is 15-24 years old. Every forth child has lost one or both parents due to HIV/AIDS.

60% of all people who get infected by HIV/AIDS are between 15-24 years old.

Girls are facing even higher risks: 4 out of 5 new infected HIV/AIDS patients (15-24 years) are girls.

Lowest level of school education: Every forth person older than 15 years can neither read nor write.

60% of all people who get infected by HIV/AIDS are between 15-24 years old.

We train teachers as multipliers to inform children about HIV/AIDS. In addition to that, we strive to make girls strong. LIFE SKILLS THROUGH GAMES is our concept of special workshops. We train teachers as ambassadors and provide them with pedagogic skills.

Girls are especially encouraged.

Approx. 2.5 mio people live in Kagera region in the north-west of Tanzania. ⅕ of them is 15-24 years old. Every forth child has lost one or both parents due to HIV/AIDS.

We are proud of what we have achieved so far:

- **310** schools have trained their teachers in our workshops so far.
- **155,000** kids have learnt more about the risks of HIV/AIDS. Girls are especially encouraged.
- **6,510** (donated) sports sets for female pupils and teachers have been given to schools.
- **95,3%** of our donations have been used immediately for our work in Tanzania in 2011.
